INSTALLATION INSTRUCTIONS

For Model 72397

WARNING! SHUT POWER OFF AT FUSE OR CIRCUIT BREAKER.

AVERTISSEMENT! COUPER LE COURANT AU NIVEAU DES FUSIBLES OU DU DISJONCTEUR.

HANGING THE FIXTURE (Fig. 1)

1. Shut off the power at the circuit breaker and remove the old fixture, including the mounting hardware.
2. Carefully unpack your new fixture and lay out all the parts on a clear area. Take care not to lose any small parts necessary for installation.
3. Attach the mounting plate (C) to the outlet box (A) (not supplied) with mounting screws (B) (Size: #8-32*0.78"L)
4. Thread the mounting screws (E) into the threaded holes in mounting plate (C) spaced the same distance apart as the mounting holes in the fixture backplate (D). Note: The length of the mounting screws into the mounting plate (C) may be adjusted if necessary.

CONNECTING THE WIRES (Fig. 2)

5. Connect the electrical wires as shown in Fig.2 making sure that all wire connectors are secured. If your outlet box has a ground wire (green or bare copper), connect the fixture's ground wire to it. Otherwise, connect the fixture's ground wire directly to the circular strap using the green screw provided.

COMPLETING THE INSTALLATION (Fig. 1)

6. Place the fixture over the mounting screws (E), and secure with lock nuts (F).
7. To prevent moisture from entering the outlet box and causing a short, use clear caulking (i.e. Indoor/Outdoor Silicone Sealant) to outline the outside of fixture backplate where it meets the wall leaving a space at bottom to allow moisture a means to escape. (Fig. 3)
8. Bulb (G) information: (1 x AC LED 10W included.) **DO NOT EXCEED THE MAXIMUM WATTAGE RATING! (NE PAS DEPASSER LA PUISSANCE NOMINALE MAXIMALE!)**

Replacing LED module (Fig. 4)

The LED module can be replaced by a qualified electrician without cutting of wire and without damage to any decorative element to which the fixture is attached. See installation steps for more details (Fig 4.)

a. Turn off power circuit breaker. Separate fixture body (T) from top cover (S) by removing screws (R) (Fig.1).
b. Remove aluminum plate (O) by loosening screws (K).
c. Remove wire nuts (L) hex-nuts (N) washers (M) and carefully remove LED module (Q) for re-lamping. Note: The LED module should be provided by a specified supplier.
d. For better heat dissipation the LED module (Q) should be installed with the heat transfer material (P) when re-lamping .

Your installation is now complete. Return power to the junction box and test the fixture
